THE BASSANO MAIL

Published every Thursday
Wallace J. Smith
editor and publisher

Hon. R. O. Reid, Alberta's new premier, is not a talkative man so far as his governor's place is concerned. Up to Tuesday afternoon he maintained a strict silence on the new ministry.

Police dogs are regarded as a menace in Vulcan where the town council has passed a by-law prohibiting the raising of such dogs at large. Police dogs may be all right in their place, but when large numbers of them are allowed to run at large they become a nuisance. This breed of canine has been denounced by many persons as a vicious, and even dangerous, type of dog, following numerous attacks upon children and others. The trouble at Vulcan was a different sort, and concerned the killing of 40 chickens one night by two dogs. Lovers of the breed root at the theory that the police dog is not very far removed from the wolf. They claim he is directly descended from a wild dog. Whether wild dog or wolf, it matters little what his ancestors were, for both types are bloodthirsty predatory animals.

At this date it is too early to estimate the probable wheat yield from Bassano crops without the use of qualifying clauses. But it's a good looking crop, and that's a good crop during the last five years. At verse weather conditions between now and the harvest would seriously affect the yield, but with the late rain and good growing weather, the harvest should be at least fair.

KN DIDN'T REALIZE

He didn't realize that when he stepped upon the head of a nail...

Of some well-filled oaten bowls, drink every night with a delicious...

Drop them from Heaven, where they were sent, and the joys of earth and air are things...

That with the foot and stage, doat hop and foot, and when the poppy waxes, thou dost...

Drop them, to the carved ground below. That's what Heinrich Laveland wrote about the grasshopper.

The poet and cavaler lived in England, in 1855. Perhaps being a poet, he had a knowledge of the hopper...

He wrote the last two lines of the verse. Had you ever seen anything like it for downright nonsense?

"Heaven, where thou wert reared?" Your praise who grows would call that a demure insight. Imagine the grasshopper being heaven-sent...

You can't make a farmer whose fields are swarming with hoppers believe that sort of rant.

He is more likely to believe the hopper is an agent of the devil himself and wish the locusts were back in the lower regions where he belongs.

Laveland was fond of fighting as well as writing poetry. He was wounded while fighting for the King of France against Spain. On his return to England he was imprisoned, and during his sojourn in the toils he occupied himself with writing poetry.

It's all very well for Laveland to have written fine words about the hopper while loitering behind the bars of a prison, but if he had to get up at sunrise and spread poison bait to save his wheat crop from the ravaging insects he would have acquired a new slant on the brute.

HALF HOLIDAY FOR FARMERS (Hansa Herald)

High River U.P. members have declared themselves in favor of a half holiday for farmers. This is a really sensible idea and we hope it is fully developed.

The average farmer and his family have gloried in work. In fact, when other classes were agitating for shorter hours, that same farmer was bragging about how early he got up in the morning and how long he worked throughout the day.

The farmers have been working too doggone hard and long. It's time they learned how to play and enjoy life. Why shouldn't a farmer enjoy the relaxation of a golf game or a fishing expedition just as well and as often as any body else?

The funny part of it is that the harder a farmer works the more he produces, and the more he produces the less he gets. To finish the circle, the less he gets the harder he works to produce more. Where is the intelligence in all that?

The capitalist has the right idea. He works little and plays a lot. The labor people have spotted that, and they sensibly want to go and do likewise. It is only the benighted farmer who apparently wants to work all the time.

Camp Meals

Unfortunately, indeed, is the boy or girl who does not know the wholesome joys of summer camp, who has not felt the exhilaration that comes from being close to nature and under the "spell of the open sky"; whose nostrils are familiar with the savory odor of steaks sizzling over an open fire.

Camp days can be some of the happiest days of a child's life. There's a thrill in delving into the wonders of nature. There's stimulation in the health-giving freshness of air and sun and sunshine. There's relaxation in the long, nerve-soothing silence of the open air.

Justed appetites are revived after a long tramp through the woods or an exhilarating swim. Johnny, who wouldn't drink milk at home, finds it tastes surprisingly good at camp.

And Susan who usually turns up her nose at eggs welcomes them with a zest when they are served on a bacon triangle hot off a large stone.

Do you know how to fix them that way? Find some flat stones and put them beneath the fire to get hot. When they are heated and out from beneath the fire, lay triangles of bacon on them. Place the three strips of bacon for each triangle close together so that when the fat melts and the egg is broken into it, it will hold together and you can turn it by lifting the bacon. Simple, isn't it?

It's surprising how easily a full meal can be prepared over an open fire without the use of even a single cooking utensil. And it is hoaps of fun.

Broiled Steak and Baked Potatoes
Take 4 pounds of round steak and a half of an onion for each person. Cut the slices of meat into 1 1/2 inch pieces when it is ordered. Cut a cross cut, and sharpen it at one end. With a pierce one of the pieces of meat, then a slice of onion, then a piece of meat and so on, until everything is on the stick. Broil the meat by holding it over the fire. Turn the meat every ten minutes to broil over hot coals.

The potatoes are baked by wrapping them in wet leaves or wet brown wrapping paper and hanging them under the fire. The jacket about an hour, depending upon the size of the potato. As soon as the potatoes are done, be sure to break them open so that the steam may escape and the potatoes will be flaky and not soggy.

Bassano can be baked the same way as potatoes. In about 15 minutes. You might want to square a bit of bacon later over the banana when eaten. Or here's another idea: Lay back a section of the banana in the center, two or three small chunks of banana and replace by bits of marshmallow to fill the space. Then bind the peeling on again and roast under the fire.

Today and Tomorrow
By Frank Parker Blockbridge

THE FACT FINDERS--and Their Discoveries

ANOTHER DAY, ANOTHER FACT FINDING. THE FACT FINDERS WILL GET UNDER WAY.

THE DISCOVERY BY THE RESEARCH LABORATORY OF THE DE POST COMPANY OF A WAY TO MAKE A SUBSTITUTE FOR RUBBER OUT OF GAS IS ONE MORE PROOF OF THE VALUE OF PURE SCIENCE.

Only chemists familiar with every phase of that complex science would have dreamed of the possibility that you can heat coal and limestone and from the calcium carbide thus obtained produce acetylene gas by adding water, and then by adding salt get a new chemical, chloroprene which coagulates into a substance which, while not real rubber, makes just as good automobile tires as rubber does.

Natural rubber is so cheap now that it doesn't pay to use this new product. But if another war should send rubber up to \$2 a pound, as the last one did, or even an eighth of that price, the United States would be independent of the South American and East Indian rubber growers.

Now almost the only things that we have to import are things we never got along without in the first war, such as coffee, tea and chocolate.

PLAVINS ... and Russia
A good many people seem surprised that Russia should be able to build an airplane carrying forty passengers. The new "Maxim Gorky" with each engine of 2,000 horse power is reported to be a great success. Most Americans have forgotten that, apparently, that the "biggest" plane that had ever been built, and where until after the great war was the giant Sikorsky plane in 1913. Sikorsky, the Russian designer, came to America after the war and built some of the best planes we have turned out.

The war, instead of stimulating aviation here, has retarded it. It is money saved by reducing attention on military planes, which have to be totally different from commercial planes. Passenger and express planes did not really get a fair start until the old war planes had been scrapped.

The first public flight of an airplane was only 25 years ago. In June 1908, when Glenn Curtiss, the "flying man" of Hammondsport, N. Y., considering all that has happened since, we've gone a long way in flying, but there is a long way to go yet.

MOVIES ... home-cleaning
There is a great promise in the latest move to "clean up" the movies. The Federal Council of Churches of Christ in America, representing practically all of the Protestant denominations, has joined forces with the Council of Roman Catholic Bishops to take direct and aggressive action to safeguard the morals of the young folk who constitute the bulk of the audience.

It is time that the churches, as the source of moral instruction, took a position in the matter of the movies from which they cannot be ousted by the powerful political and financial interests which lately on the distortion of truth and the debasement of ideals.

HOMES ... cost too much
Most houses cost too much. Every body who has given serious thought to the subject of housing agrees to that. Better houses can be built for less money and the fact is coming when everyone will realize that I don't know how long it will take before one can buy a house as one buys an automobile, already to set up and live in, but many folks predict that it is coming soon.

If automobiles were built with as much waste of time and labor as good modern houses, the cheapest car would cost \$50,000 or so.

On the other hand, many houses cost little enough. I read the other day of a family in a small built itself a new house for 16 cents. That was all the money they spent, and it went for window glass. The housefolk of the family quarried the stone, cut the wood, did all the work and built a bigger house for a growing family.

Some of my country neighbors have done almost the same thing, good houses, too, they have constructed with their own hands. That was the way almost every house in 1786, is good for another hundred years or more. I think we are going to see a return to simpler and less expensive housing for everybody.

Fifty-fifty
"You ought to give your sonnet to your little brother sometimes," said Auntie severely.

"I do, auntie," declared Johnny. "He gets up to the hill and I have to go down."

JAMES JOHNSTON
"The Quality Store"

THE PICTURES

Warner Baxter stars in "Arthur Benson's" "Penhouse", coming to the Orpheum Theatre of this week. The genius of Roche never created a more absorbing story—so baffling mystery in a setting of New York's luxurious penthouse life, with the most unusual and satisfying romance ever brought to the screen. Myrna Loy, Charles Butterworth, Phillips Holmes, Mac Clark, and C. Henry Gordon, are in the story. See the story of the crime in the clouds that brought two lovers together.

At a public dinner in London the chairman hoped that "The visitors will carry away with them some interesting souvenirs of their presence this evening."

LOCAL NOTES

Harry Beeber got a trout trower on Monday morning when he surprised a mongrel dog asleep on the sidewalk beside McKee's store. His steps aroused the animal and it instantly snapped at him. The dog had been wounded, apparently by a gas shot.

H. W. Ford went to Calgary Tuesday evening on a business trip. Mr. and Mrs. H. G. Angell, Ellis and Peter, accompanied by Archie Johnston, returned Sunday evening following a few days' vacation in Banff.

Mr. and Mrs. E. A. Beck, of Lethbridge, were guests at the H. W. Ford home early this week.

H. W. Harper left Tuesday morning to join his family on vacation at Sylvan Lake.

Roy Gayford is spending a vacation at Sylvan Lake.

Mr. and Mrs. A. Bowman have moved into the Culbertson house, rear door to the Roy Smith residence. Mr. Bowman, who comes from Medicine Hat, is mechanic at Roy Smith's garage.

Henry Hepner returned last week from a trip to California. He reports business seriously affected by the long-continued strike.

Mrs. Geo. Murdoch and daughter, Christina left by car last Friday for Field, B. C., to visit Stuart Murdoch.

Mr. and Mrs. N. E. Hume were visitors to the Calgary Stampede on Monday.

R. Ueberling was a caller in Calgary early this week.

Mr. and Mrs. H. Scott, Calgary, called on Mr. and Mrs. J. Stornace last Tuesday evening. Mr. and Mrs. Scott were on their way home from a trip to Ontario.

Mrs. Geo. Ungarion is visiting her married daughter in Saskatchewan.

Mrs. Geo. Morrison left last Sunday for New York City. She intends to pay a visit to the Century of Progress in Chicago.

Mrs. Clara McKinnon has as her guests her father, J. P. Hunter of Barham, Ontario, and her nephew young Gordon MacDonald of Charlottetown.

Miss Mary Nesbitt of Nanton, is also a guest at the McKinnon home. The party attended the stampede and all others' gathering in Calgary early this week.

Mr. and Mrs. R. M. Eastbrook and children are away on a two weeks vacation to Corbin, south-western Alberta.

Lloyd Leonard has landed a job as Linotype operator with the Grand Prairie Herald. He leaves Sunday for the north town.

Mrs. Margaret Richards is leaving early next week for Emerald Lake, B. C., for the summer months.

Louis Conn motored to Calgary Wednesday.

Young Lorne Caswell established his reputation as a rider at the Calgary Stampede last Tuesday. He won first prize day money in the boys' steer riding contest.

Among those from Bassano attending the Calgary exhibition and stampede this week are: Mr. and Mrs. Roy Smith and children, W. A. Brodie, J. H. Stiles, Constable Gray, Mr. and Mrs. E. P. Currie and Bob, Mr. and Mrs. W. E. Fry, fair and daughters, the Plummer family; Mrs. T. Ingeberg; Sgt. J. N. Cassey; Mrs. T. H. Hunter, Mrs. L. Burch; Mr. and Mrs. L. Conn; and Donald Macgregor.

Mrs. D. MacLeod and children were week-end visitors in Calgary, returning home Monday evening.

Mr. and Mrs. W. P. Keith and son are visiting relatives in Calgary this week.

Ten local C. G. I. T. girls are now enjoying an outing at the district camp on the Bow river near Arrowwood. They left yesterday, Wednesday, Mr. Jacobson, taking the party with his car and a trailer, and they will remain in camp a week. C. G. I. T. girls from Husar, Gleichen, and other points are also camping at the same place.

Young George Stiles is hobnobbing around on crutches. He had a troublesome toe amputated.

Horace Brown, of Patricia, was in Bassano for a game of tennis last Sunday afternoon.

Gordon Fisk returned last Sunday from a vacation spent at his home in High River.

Fred Galarrondo, Gen. rider, won second day money in the Canadian bucking horse contest at the Calgary stampede.

Mr. and Mrs. Chas. Hopkins have moved into the house recently vacated by the Ravey family, across the street from Dr. Barlow's residence.

Dr. A. E. Wilson, who has been attending Dr. Scott during the last few weeks, left last Friday for Edmonton where he is on the staff of the Royal Alberta Hospital.
